

Project Flow

Date	19 NOVEMBER 2022
Team ID	PNT2022TMID29709
Project Name	FERTILIZER RECOMMENDATION FOR DISEASE PREDICTION

Project Flow:

- Download the dataset.
- Classify the dataset into train and test sets.
- Add the neural network layers.
- Load the trained images and fit the model.
- Test the model.
- Save the model and its dependencies.
- Build a Web application using a flask that integrates with the model built.
